

B1
(concluded)

a motherboard connector to be mounted on a motherboard to receive said edge connector with said processor in an orientation parallel to and displaced from said motherboard.

12. (Once Amended) A mount for a processor, comprising:

a motherboard;

a receiving slot connected to said motherboard and configured to receive a connector for a processor;

guides for guiding said connector into said receiving slot, wherein said processor is horizontal to and displaced from said motherboard after said connector is inserted into said receiving slot.

13. (Once Amended) A mount for a processor, comprising:

a motherboard;

a single edge connector cartridge processor having a connector;

a receiving slot connected to said motherboard and configured to receive said connector;

guides for guiding said connector into said receiving slot, wherein said processor is horizontal to and displaced from said motherboard after said connector is inserted into said receiving slot.

16. (Once Amended) A method of mounting a cartridge processor having an edge connector on a motherboard comprising:

inserting the edge connector of said processor in a connector on said motherboard, said processor having an orientation parallel to and displaced from said motherboard.
